DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 14-19 are rejected under 35 U.S.C. 102(b) as being anticipated by *Glover et al* (US 5,225,781).

Glover et al anticipate all claimed features claims 1-3 and 14-16.

Claims 1-3: Glover et al disclose a method of obtaining magnetic resonance (MR) signals with signal separation for at least two chemical species in heterogeneous magnetic field with steps comprising obtaining first MR signals from pixels in an object having at least two chemical species using first repetition and first echo time and obtaining at least second and third subsequent MR signals from the pixel using second and third echo times, determining a signal for each pixel by combining all signals for the pixel using linear square fit (see equation 26 in col. 26) decomposition, calculating first error to the heterogeneous field, repeating the steps above until threshold error is achieved (col. 4, line 34 – col. 5, line 26; col. 8, line 48 – col. 10, line 13; col. 11, line 27 – col. 12, line 61).

Claim 4: Glover et al disclose in equations 17-19 where the MR signals are defined in real and imaginary function to represent spatial and phase information.

Claims 14-16: Glover et al further disclose that the method includes combining each scan's heterogeneous field and determining weighting contribution or coefficient (col. 13, line 66 – col. 14, line 11).

Claims 17-19: In addition, Glover et al disclose determining the map of the combined field in equations 29 and 30. The equations are in different form analog to digital, otherwise, the map function is identical (col. 13, lines 3 – 31).

Allowable Subject Matter

3. Claims 5-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
